

## National educational seminar Hammersmith Infant Neurological Examination (HINE)

19-20<sup>th</sup> of January in Stockholm, Sweden

**Topic:** This 2-day educational seminar provides an introduction to the Hammersmith Infant Neurological Examination (HINE) in young infants. Compelling evidence has shown that using this assessment method at early age, in combination with other well established assessment methods such as Magnetic Resonance Imaging and General Movement Assessment, is a strong predictor for later adverse motor development in high-risk infants. The HINE is today strongly recommended as a standard assessment in the National neonatal follow-up program in Sweden.

### Who should attend?

Neonatologists, pediatric neurologists, physiotherapists, nurses and other professionals in the field of infant neurology

### Course instructors:

*Professor Frances Cowan*, Imperial College London/Bristol University, United Kingdom

*Professor Leena Haataja*, University of Helsinki, Finland

*Professor Brigitte Vollmer*, University of Southampton, UK and Karolinska Institutet, Sweden

### Location:

Karolinska University Hospital, Solna, 171 77 Stockholm, Sweden (exact location will be announced closer to the course)

**Practical information:** Participants are responsible for bookings of travel and accommodation as well as for food and coffee etc. during the days.

**Registration and information:** [maria.ortqvist@ki.se](mailto:maria.ortqvist@ki.se), deadline 19<sup>th</sup> of December

Please include your name, profession and motivation for attending the seminar in the e-mail. This information will be used to prioritize among applicants, if there are more registrations than available spots. There is a maximum of 30 participants.

### Welcome!

*Maria Örtqvist*, Med Dr, physiotherapist, specialist in pediatrics

*Ulrika Ådén*, Professor of neonatology
